Precision Metal
Fabrications and
Assemblies

WELCOME

COMMITTED TO QUALITY, SERVICE AND DELIVERY

Everhard Products, Inc. specializes in the manufacture of sheet metal parts and complex assemblies.

Everhard is committed to active partnership with our customers. Everhard has earned its customers' trust by providing consistent quality, delivery, and pricing.

Whether we work from your drawings or assist in the design of your parts, we function as an extension of your operations – our services are tailored to your specifications for optimal efficiency on each project.

With facilities that include more than 90,000 square feet, Everhard has built its capability to include the latest sheet metal fabrication, electronic assembly, and finishing equipment. Everhard represents a legacy of experience, technological innovation, cost efficiency, and most important – quality. We are proud that this tradition has earned us the reputation of a respected leader in the manufacture of precision sheet metal parts and electronic assemblies.

QUALITY FIRST

“Quality First” is the cornerstone of Everhard’s corporate strategy.

We recognize that producing the highest quality products is the responsibility of quality-conscious management and of every associate sharing total focus on customer satisfaction.

We are committed to meeting the ISO standard as we provide precision metal fabrication and electronic assembly services to our customers.

EVERHARD’S QUALITY POLICY

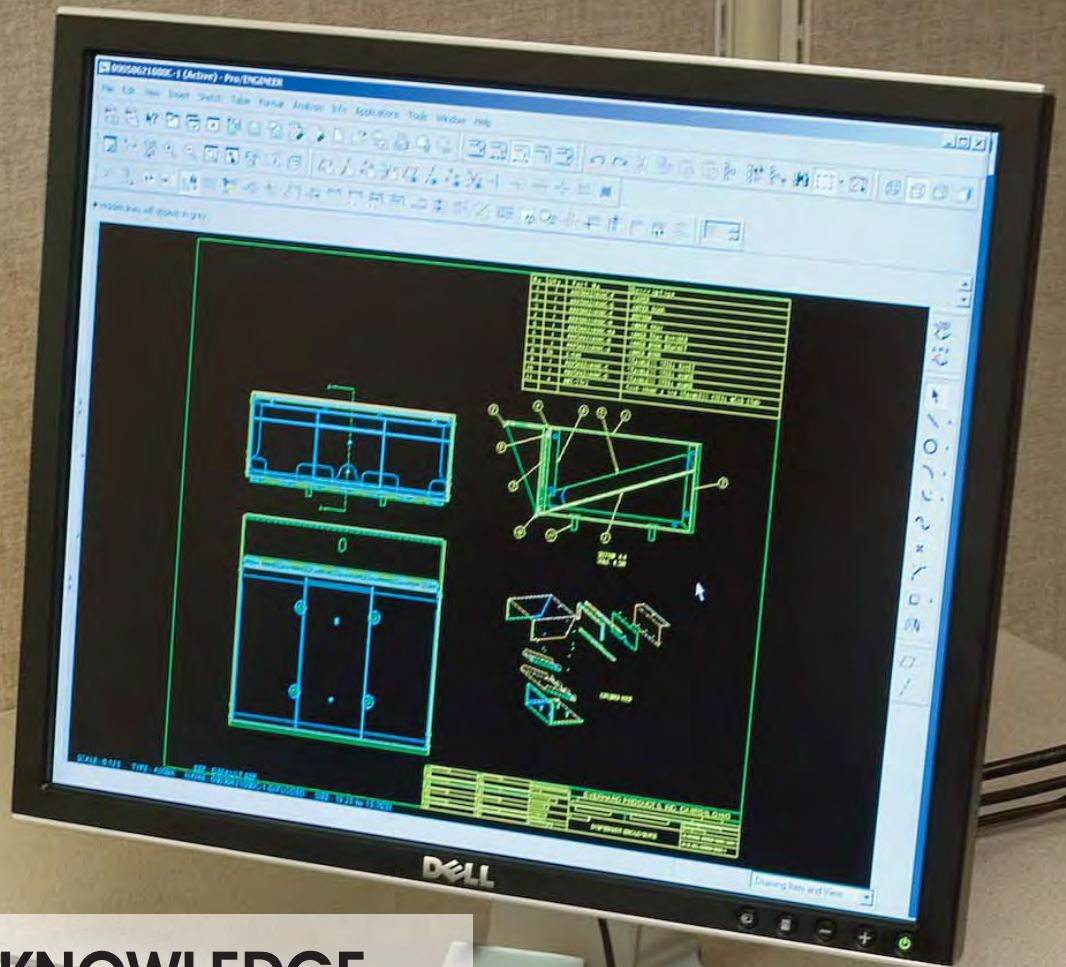

- Provide quality products and on-time delivery to meet or exceed each customer’s expectations.
- Encourage an environment that supports teamwork for continuous improvement by providing proper leadership, adequate training and necessary resources.
- Maintain a formal quality system meeting the ISO 9001:2008 standard.
- Communicate these quality objectives to all associates, customers and suppliers.

Quality
ISO 9001

Everhard Products, Inc. has achieved and maintained ISO 9001 registration with QMI-SAI Global. Registration to ISO 9001:2008 affirms that Everhard’s quality system meets internationally recognized quality standards.

ENGINEERING

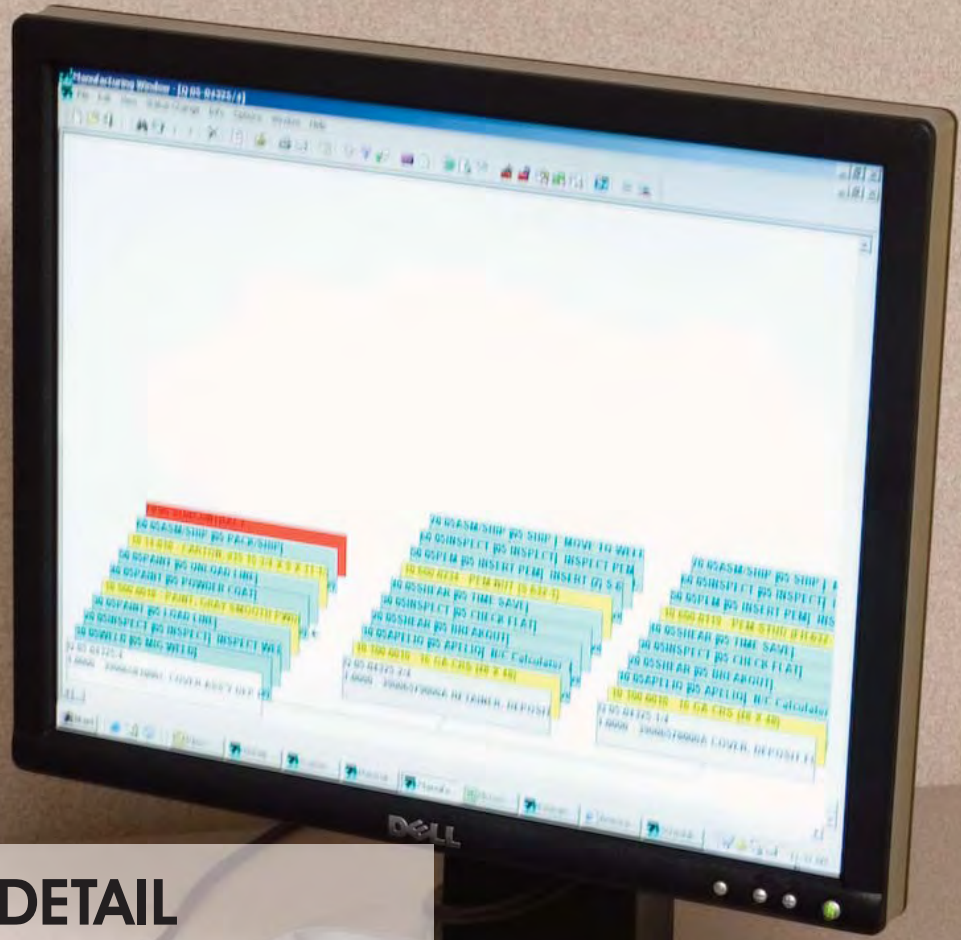

EXPERIENCE, KNOWLEDGE, TECHNOLOGY

Everhard's engineers bring to each project an in-depth knowledge of precision sheet metal manufacturing and assembly. The attention to detail provided by our engineers and quality assurance team produces the best quality parts for our customers.

After receiving the customer's order for a particular part, our engineers create accurate, well-documented drawings and manufacturing process sheets. Every operation required to produce that part is fully documented and in place before manufacturing begins.

PRODUCTION / MANAGEMENT

ATTENTION TO DETAIL

Everhard's fully integrated computer system covers every aspect of a customer's project – from its initial acceptance to its delivery. Using software that enables us to plan the customer's project and monitor its progress, we can quickly access each job's status as it moves through our plant. This allows us to give our customers information about quantities, scheduling, and ship dates, as well as foresee potential obstacles.

For all of its internal plant operations, Everhard uses bar coding of inventory and labor acquisition, estimating, scheduling, and job control – all integrated into a single manufacturing control system.

FABRICATING

FOCUSED ON MAKING THE HIGHEST QUALITY PRODUCTS... EVERY TIME

At Everhard, we work hard to maintain and upgrade our exceptional facilities. We have both the physical and human resources needed to ensure all jobs are done according to our customers' specifications, budget, and delivery dates.

Everhard continually expands and upgrades its capital equipment, keeping up with technological advances to ensure continued improvement in our capability and competitiveness.

Highly skilled and trained operators run our equipment. Experienced staff perform several tasks by hand that cannot be performed by machine, such as the smooth blending of welded corners or the exact placement of assembled parts. This union of technological efficiency with high quality craftsmanship is what sets Everhard apart from most other sheet metal fabrication shops. Everhard has the facilities, the capacity, the equipment, and the experienced people to handle projects of all sizes.

PAINTING

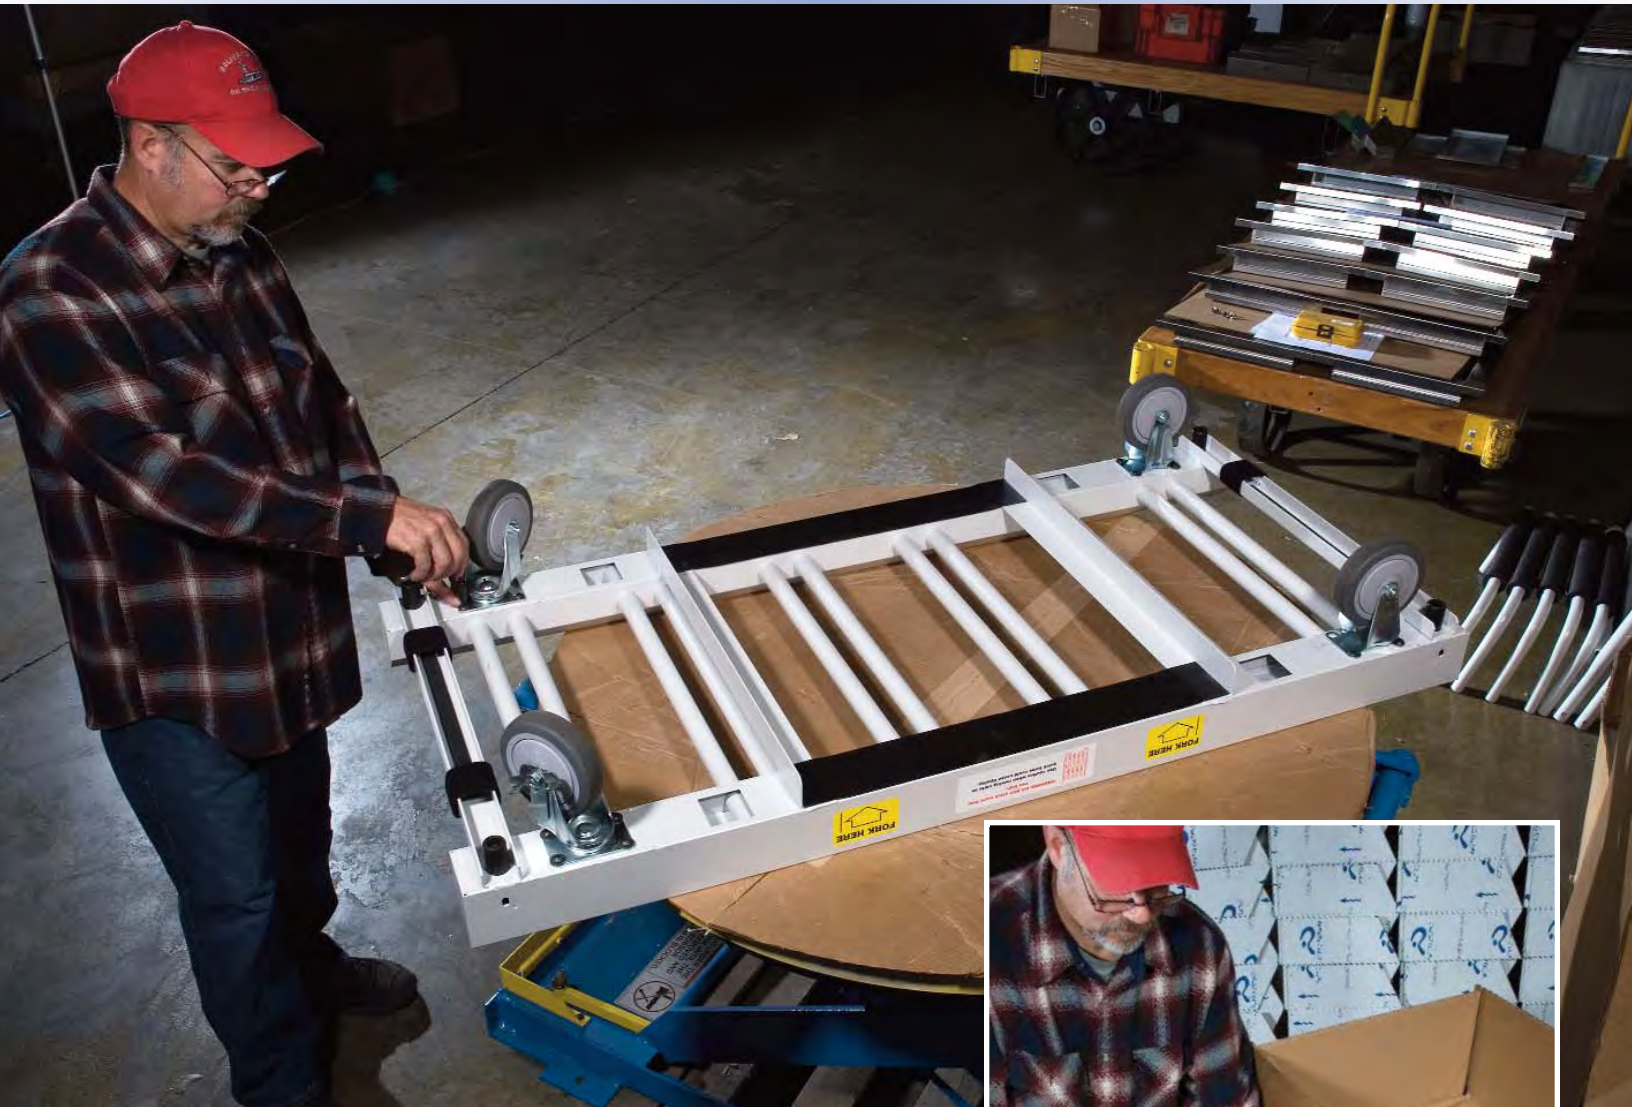

PERFORMED IN-HOUSE FOR TOTAL CONTROL

Our finishing capabilities include both powder-coating and electro-static wet spray. We can apply virtually any type of painted finish our customers require – including smooth, textured, spatter, and wrinkle coats. Our paint line is geared for rapid set-up and fast color changes.

ASSEMBLY / PACKAGING

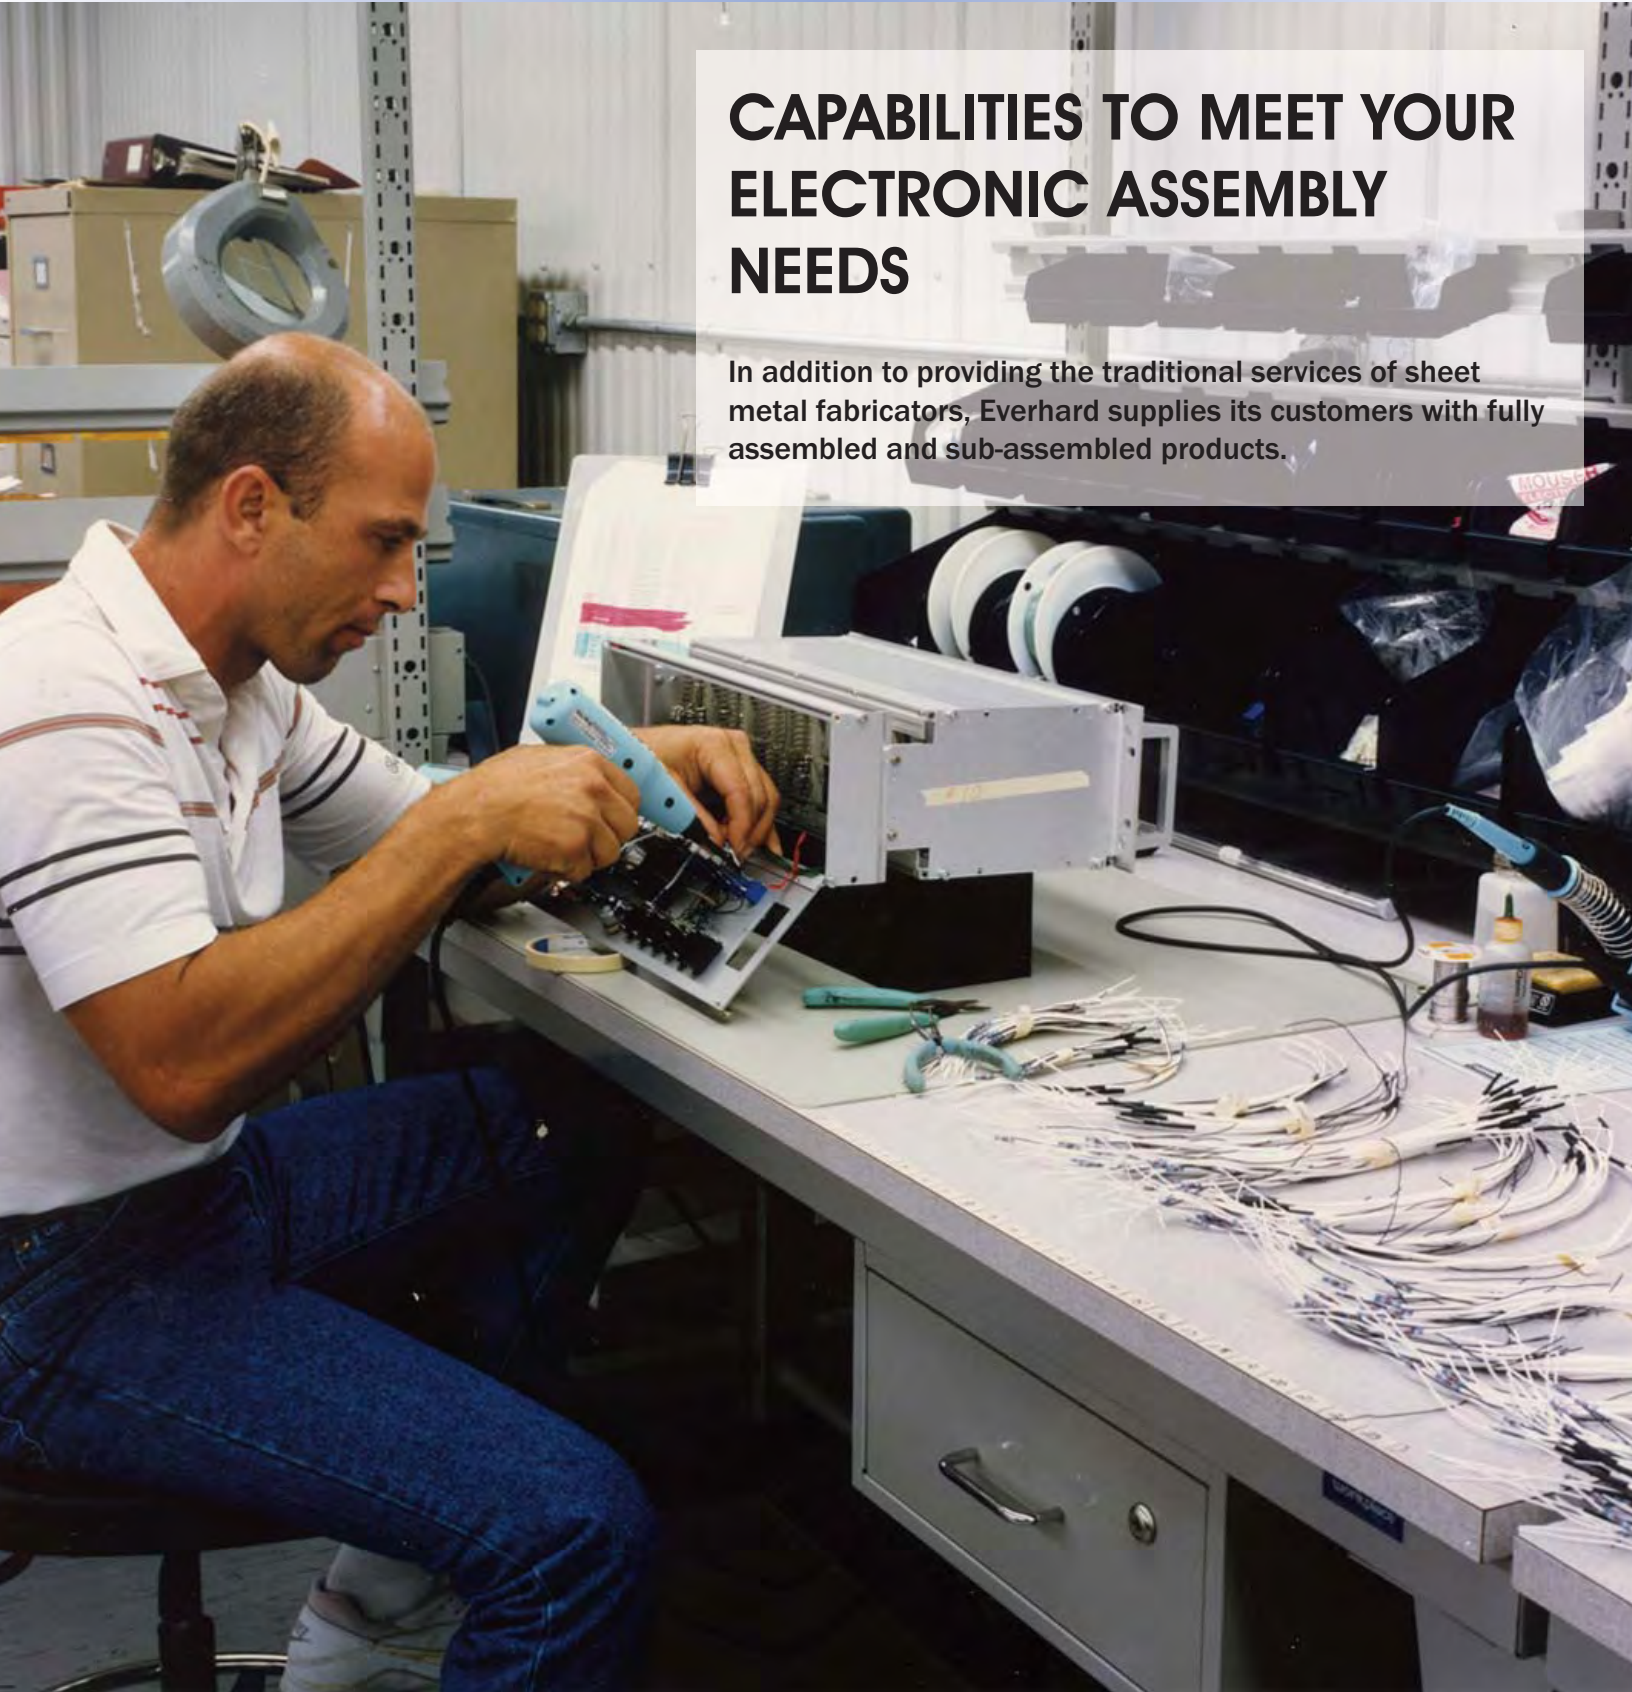

Whether simple component parts or more complex mechanical assemblies, Everhard can manage the project – from engineering and production management, to fabrication, assembly, and finishing.

ELECTRONIC ASSEMBLY

CAPABILITIES TO MEET YOUR ELECTRONIC ASSEMBLY NEEDS

In addition to providing the traditional services of sheet metal fabricators, Everhard supplies its customers with fully assembled and sub-assembled products.

Everhard's skilled assembly teams use the latest in electronic assembly equipment and provide the following services:

- Full product assembly and sub-assembly
- In circuit and functional testing
- Wire-harness assembly
- Materials procurement
