## NOW AVAILABLE FOR TIRE KNIVES!

- PLASTIC HANDLES
- ERGONOMIC CUSHION GRIP HANDLES

Everhard manufactures many of our knives with a plastic handle, available with or without the ergonomic cushion grip option.

- Hook knives
- Trim knives
- Ply knives

## ADVANTAGES OVER WOOD HANDLES:

- **Longer Life:** Heat resistant plastic increases the handle's life by eliminating wood handle burnout.
- **Ergonomic:** Larger, oval-shaped handle is tapered, with a softer surface -- making the knife easier to grip with less stress on the operator's hand. Comfortable to use.
- **Safe:** Handle has no metal parts to heat up, avoiding handle burnout or accidental burns.
- **More Efficient:** Oval shape orients knife in the hand and eliminates roll-away.
- **Lower Risk of Product Contamination:** Product contamination is less likely with Everhard's plastic handle versus a wood handle.
