

EVERHARD BURN-IN KNIVES

All burn-in knives have hardened tool steel blades. Ceramic cement embeds the knife blade in the handles, allowing the knives to withstand high temperatures without the blade coming loose. Handles have no metal ferrules or pins that could trap heat and cause potential burns. Everhard's burn-in knives are ideal for use in refinishing, furniture repair, and wood, plastic, or leather restoration.

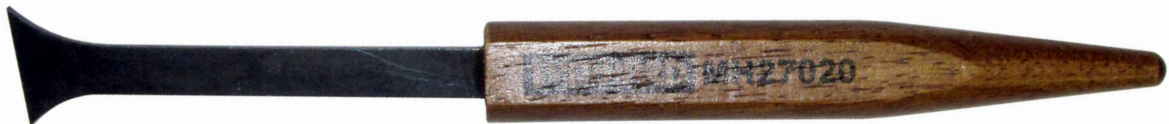

MH27000

Burn-In Knife (BK-750), 4" semi-rigid blade
Weight = 0.300 lbs - Pkg/12

MH27010

Burn-In Knife (BK-625), 4-1/8" semi-rigid blade
Weight = 0.100 lbs - Pkg/12

MH27020

Burn-In Knife (BK-500), 3-1/2" rigid blade
Weight = 0.124 lbs - Pkg/12

MH27030

Burn-In Knife (BK-375), 3-3/8" rigid blade
Weight = 0.080 lbs - Pkg/12
